

# Fecal Occult Blood Rapid Test

Fecal Occult Blood Rapid Test, from Creative Diagnostics, is a qualitative test detecting human hemoglobin in human fecal specimens. This kit is using double antibody sandwich assay to selectively detect hemoglobin as low as 50mg/ml or 6 µg hemoglobin/g feces. Visually, the kit will diagnose gastrointestinal bleeding in vitro assay and in one step.

CAT#	Description
DTS157	<p><b>Each Test Contains:</b></p> <ol style="list-style-type: none"><li>1. One cassette device</li><li>2. Specimen collection tube with extraction buffer</li><li>3. One desiccant.</li></ol> <p><b>Each Kit Contains:</b></p> <ol style="list-style-type: none"><li>1. 20 test devices</li><li>2. One instruction</li></ol>

- CLIA waived and FDA 510(k) cleared to market
- No dietary/medication restrictions
- Clear and simple illustrations to guide the FOB test procedure
- Self-contained specimen collection tube
- Ready to use, no need for additional equipment
- Results in 5 to 10 minutes
- High sensitivity and specificity
- Room temperature storage

- Recommended for use in:
- Routine physical examination,
- Hospital monitoring for bleeding in patients,
- Screening for colorectal or gastrointestinal bleeding from any sources.
